VOLUME 7 1983

SUBJECT INDEX

Acetylcholine, 73
  amphetamine
  cholinergic pathways
  lecithin
  motion sickness
  scopolamine
  vestibular apparatus
Adjunctive behavior, 97
  arousal
  defecation
  drinking
  eating
  grooming
  locomotor behavior
  oral behavior
  polydipsia
  schedule-induced behavior
Adrenal-pituitary axis, 325
  barbiturates
  benzodiazepines
  cannabinoids
  endorphins
  extinction behavior
  neuroleptics
  neurotransmitters
  peripheral hormones
  psychedelics
  psychological mechanisms
  stimulants
Age differences, 349
  genetics
  sexual behavior, males
Aggression
  case report, 419
  cats, 395
  cognitive disturbances, 409
  epilepsy, 427
  homicide, 419
  human studies, 391, 419
  lesions, right temporal lobe, 419
  limbic system, 391, 395, 409
  pseudopsychopathic syndrome, 409
  stereotaxic depth recording, 427
  social behavior, 409
  temporal lobe epilepsy, 391
Amphetamine, 73
  acetylcholine
  cholinergic pathways
  lecithin
  motion sickness
  scopolamine
  vestibular apparatus
Animal intelligence, 309
  comparative psychology
  evolution
  learning theory
Animal model
  cancer anorexia, 471
  hypertension, 493
  norepinephrine dopamine, 471
  open field, 493
  psychosomatic disease, 511
  strain differences, 493
  stress, 493, 511
  sudden death, 511
  tryptophan, 471
Animal studies, 1
  central nervous system
  gonadal hormones
  human studies
  sensory functions
Antiparkinsonian agents, 227
  antipsychotics
  dopamine agonists and antagonists
  multiple dopamine receptors
  Parkinson's disease
  schizophrenia
Antipsychotics, 227
  antiparkinsonian agents
  dopamine agonists and antagonists
  multiple dopamine receptors
  Parkinson's disease
  schizophrenia
Appetite, 281
  eating
  monoamines
  neuropeptides
  opioid peptides
Arousal, 97
  adjunctive behavior
  defecation
  drinking
  eating
  grooming
  locomotor behavior
  oral behavior
  polydipsia
  schedule-induced behavior
Atherosclerosis, 485
  monkeys
  social instability

Barbiturates
  adrenal-pituitary axis, 325
  behavioral development deficits, 19
  benzodiazepines, 325
  cannabinoids, 325
  central nervous system, 19
  endorphins, 325
  extinction behavior, 325
  neonatal drug administration, 19
  neurogenesis, 19
  neuroleptics, 325
  neurotransmitters, 325
  peripheral hormones, 325
  prenatal drug administration, 19
  psychedelics, 325
  psychological mechanisms, 325
  stimulants, 325
Behavioral development deficits, 19
  barbiturates
  central nervous system
  neonatal drug administration
  neurogenesis
  prenatal drug administration
Behavioral effects
  lesions, hippocampus, 119
  lesions, septum, 119
  MIF-1, 257
  opiate antagonism, 257
Benzodiazepine receptors, 107
  diazepam
  endogenous ligands and modulators
  kynurenine
Benzodiazepines, 325
  adrenal-pituitary axis
  barbiturates
  cannabinoids
  endorphins
  extinction behavior
  neuroleptics
  neurotransmitters
  peripheral hormones
  psychedelics
  psychological mechanisms
  stimulants
Beta adrenergic receptors, 503
  stress
Blood-brain barrier, 263
  central nervous system
  oxytocin
  vasopressin
Body weight, 189
  eating
  estrogen
  hypothalamic regulation
Brain
  amygdala, 375, 395, 419, 427, 453
  anterior cingulate cortex, 423
  caudate nucleus, 227
  caudate putamen, 227
  cerebellum, 471
  cerebral cortex, 503
  corpus striatum, 471
  cortex, 471
  diagonal band of Broca, 375
  diencephalon, 471
  hippocampus, 119, 367, 395, 427, 453
  hypothalamus, 375, 427, 471
  lateral septum, 375
  limbic system, 427
  magnocellular preoptic nuclei, 375
  medial forebrain bundle, 375
  medial preoptic nuclei, 375
  mediodorsal nucleus, 395
  medulla, 493
  mesencephalon, 471
  nucleus accumbens, 375
  pons-medulla, 471
  prefrontal cortex, 375
  schizocortex, 367
  septum, 119, 367, 395
  stria terminalis, 375
  striatum, 227
  substantia innominata, 395
  temporal lobe, 427
  vestibular apparatus, 73
  visual cortex, 213

Cancer anorexia, 471
  animal model
  norepinephrine dopamine
  tryptophan
Cannabinoids, 325
  adrenal-pituitary axis

barbiturates
benzodiazepines
endorphins
extinction behavior
neuroleptics
neurotransmitters
peripheral hormones
psychedelics
psychological mechanisms
stimulants
Case report, 419
aggression
homicide
human studies
lesions, right temporal lobe
Catecholamines, 29
stress
tyrosine hydroxylase
Cats, 395
aggression
limbic system
Central nervous system
animal studies, 1
barbiturates, 19
behavioral development deficits, 19
blood-brain barrier, 263
gonadal hormones, 1
human studies, 1
neonatal drug administration, 19
neurogenesis, 19
oxytocin, 263
prenatal drug administration, 19
sensory functions, 1
vasopressin, 263
Cerebrovascular attack, 35
limbic system
memory
transient global amnesia
transient ischemic attack
vasospasm
Cholinergic pathways, 73
acetylcholine
amphetamine
lecithin
motion sickness
scopolamine
vestibular apparatus
Cognitive disturbances, 409
aggressiveness
limbic system
pseudopsychopathic syndrome
social behavior
Comparative psychology, 309
animal intelligence
evolution
learning theory
Cortical plasticity, 213
developmental neurobiology
imprinting
learning
visual cortex
Cyproteronacetat therapy, 441
human studies
psychotherapy
sexual delinquence

Defecation, 97
adjunctive behavior
arousal
drinking
eating
grooming
locomotor behavior
oral behavior
polydipsia
schedule-induced behavior
Developmental neurobiology, 213
cortical plasticity
imprinting
learning
visual cortex
Diazepam, 107
benzodiazepine receptors
endogenous ligands and modulators
kynurenine
Dopamine agonists and antagonists, 227
antiparkinsonian agents
antipsychotics
multiple dopamine receptors
Parkinson's disease
schizophrenia
Drink, 97
adjunctive behavior
arousal
defecation
eating
grooming
locomotor behavior
oral behavior
polydipsia
schedule-induced behavior
Drug
acetylcholine, 73
amphetamine, 73, 385
apomorphine, 385
bromocryptine, 227
caffeine, 107
clozapine, 227
diazepam, 107
ethanol, 87
kynurenine, 107
lergotrile, 227
nomifensine, 385
phenobarbital, 19
N-n-propylnorapomorphine, 385
scopolamine, 73
sulpiride, 227
thioridazine, 227
Drug effects, 45
ICSS methodology
operant responding
reward
self-stimulation

Eat
adjunctive behavior, 97
appetite, 281
arousal, 97
body weight, 189
defecation, 97
drinking, 97
estrogen, 189
feed intake patterns, 465
grooming, 97
hypothalamic regulation, 189
locomotor behavior, 97
monoamines, 281
neuropeptides, 281
opioid peptides, 281
oral behavior, 97
oropharyngeal stimuli, 465
polydipsia, 97
ponies, 465
schedule-induced behavior, 97
Endogenous ligands and modulators, 107
benzodiazepine receptors
diazepam
kynurenine
Endorphins, 325
adrenal-pituitary axis
barbiturates
benzodiazepines
cannabinoids
extinction behavior
neuroleptics
neurotransmitters
peripheral hormones
psychedelics
psychological mechanisms
stimulants
Epilepsy
aggression, 427
limbic seizures, 453
psychopathology, 453
stereotaxic depth recording, 427
Estrogen, 189
body weight
eating
hypothalamic regulation
Ethanol, 87
GABA-benzodiazepine-chloride ionophore complex
GABAergic transmission
pharmacological manipulations
Evolution, 309
animal intelligence
comparative psychology
learning theory
Evolutionary trends, 367
morphometry
primates insectivora
structural differentiation
Experimental paradigms, 315
kin selection theory
social interactions, rodents
Extinction behavior, 325
adrenal-pituitary axis
barbiturates
benzodiazepines
cannabinoids
endorphins
neuroleptics
neurotransmitters
peripheral hormones
psychedelics
psychological mechanisms
stimulants

Feed intake patterns, 465
eating
oropharyngeal stimuli
ponies

GABA-benzodiazepine-chloride ionophore complex, 87
ethanol
GABAergic transmission
pharmacological manipulations
Gabaergic transmission, 87
ethanol
GABA-benzodiazepine-chloride ionophore complex
pharmacological manipulations
Genetics, 349
age differences
sexual behavior, males
Gonadal hormones, 1
animal studies
central nervous system
human studies

NEUROSCIENCE & BIOBEHAVIORAL REVIEWS

VOLUME 7 NUMBER 1 SPRING 1983

CONTENTS

Gonadal hormones and sensory function. GANDELMAN, R. 1

Long-lasting effects of early barbiturates on central nervous system and behavior. FISHMAN, R. H. B. and J. YANAI 19

Adaptation to stress: Tyrosine hydroxylase activity and catecholamine release. STONE, E. A. and R. McCARTY 29

Transient global amnesia. MARKOWITSCH, H. J. 35

Discriminating between reward and performance: A critical review of intracranial self-stimulation methodology. LIEBMAN, J. M. 45

Motion sickness: A modulatory role for the central cholinergic nervous system. KOHL, R. L. and J. L. HOMICK 73

The effect of ethanol on GABAergic transmission. HUNT, W. A. 87

A reinterpretation of schedule-induced behaviors based on a systematic analysis of behavior. COOK, P., M. WALLACE and G. SINGER 97

ANNOUNCEMENTS 105

NEUROSCIENCE & BIOBEHAVIORAL REVIEWS

VOLUME 7 NUMBER 2 SUMMER 1983

CONTENTS

Structure-activity relationships in kynurenine, diazepam and some putative endogenous ligands of the benzodiazepine receptors.
LAPIN, I. P. 107

Comparison between the behavioural effects of septal and hippocampal lesions: A review.
GRAY, J. A. and N. McNAUGHTON 119

The developmental and neural determinants of the effects of estrogen on feeding behavior in the rat: A theoretical perspective.
NANCE, D. M. 189

Imprinting and cortical plasticity: A comparative review.
BISCHOF, H.-J. 213

Multiple dopamine receptors and behavior.
JOYCE, J. N. 227

Behavioral effects of melanocyte stimulating hormone release-inhibiting factor-1 (MIF-1).
VON ALMEN, T. K., G. A. OLSON and R. D. OLSON 257

Centrally mediated effects of neurohypophyseal hormones.
MEISENBERG, G. and W. H. SIMMONS 263

Opioid modulation of appetite.
MORLEY, J. E., A. S. LEVINE, G. K. YIM and M. T. LOWY 281

ANNOUNCEMENTS 307

NEUROSCIENCE & BIOBEHAVIORAL REVIEWS

VOLUME 7 NUMBER 3 FALL 1983

CONTENTS

Evolutionary thinking in the history of the comparative psychology of learning.
KALAT, J. W. 309

Social interactions among rodent conspecifics: A review of experimental paradigms.
WILLS, G. D., A. L. WESLEY, F. R. MOORE and D. A. SISEMORE 315

The neurochemistry and pharmacology of extinction behavior.
MASON, S. T. 325

The genetics of hormonal influences on male sexual behavior of mice and rats.
SHRENKER, P. and S. C. MAXSON 349

MEETING REPORT

International workshop on the limbic system.
GERSTENBRAND, F., M. J. WAYNER AND W. POEWE 361

Neuroanatomy and Neurophysiology of the Limbic System

Behavioral and Clinical Aspects of Limbic System Disorders (Dysfunction?)

PREFACE 363

INTRODUCTION 365

Evolutionary trends in limbic structures.
STEPHAN, H. 367

Limbic connections to the lateral preoptic area: A horseradish peroxidase study in the rat.
WAYNER, M. J., F. C. BARONE, S. L. SCHAROUN, R. GUEVARA-AGUILAR and H. U. AGUILAR-BATURONI 375

Neurotensin affects hyperactivity but not stereotypy induced by pre and post synaptic dopaminergic stimulation.
JOLICOEUR, F. B., G. DE MICHELE, A. BARBEAU and S. ST-PIERRE 385

The limbic system and aggression in humans.
EICHELMAN, B. 391

Role of the limbic system in hypothalamically elicited attack behavior.
SIEGEL, A. and H. M. EDINGER 395

Contents continued

The pseudopsychopathic personality and the limbic system.
PETERS, U. H. 409

Klüver-Bucy syndrome in man: Experiences with posttraumatic cases.
